Notes to the financial statements for the year ended 31 March 2024
(Amount in Indian Rupees (INR) Thousands, except per share data, unless otherwise stated)

1. Corporate information

Agya Technologies Private Limited is a private limited company incorporated under the provisions of the Companies Act, 2013 on 26 April 2021, to pursue the business of Non-Banking Financial Company - Account Aggregator (NBFC-AA) and provide Account Aggregator related products and services. An NBFC-AA is a regulated intermediary dealing solely with financial information, and does not take deposits, give loans, or engage in any other types of financial transactions. The Company had applied for Account Aggregator ("AA") license with Reserve Bank of India and carry out development of AA platform, APIs, and other allied products. The Company received the certificate of registration on 31 August 2023 to commence / carry on the business of Non Banking Financial Institution without accepting public deposits.

2. (i) Basis of preparation

The financial statements of the Company have been prepared in accordance with the generally accepted accounting principles ("GAAP") in India under the historical cost convention on accrual basis. These financial statements have been prepared to comply in all material aspects with the accounting standards notified under the Companies (Accounting Standards) Rules, 2021, specified under Section 133 and other relevant provisions of the Companies Act, 2013. The accounting policies have been consistently applied by the Company and are consistent with those used in the previous year.

The Company is a Small and Medium size Company ("SMC") as defined in the the Companies (Accounting Standards) Rules, 2021 notified under the Companies Act. Accordingly, the Company has complied with the accounting standards as applicable to a SMC.

The financial statements are approved for issue by the Company's Board of Directors on 29 June 2024.

(ii) Going concern

The Company has received the Account Aggregator ("AA") license from the Reserve Bank of India on 31st August 2023, to carry out development of AA platform, APIs, and other allied products. The Company is in process of integrating with FIPs (Banks, Insurance Companies, Asset Management Companies, and GSTIN) and expects to substantially complete this activity in Financial Year 2024-25. As at 31 March 2024, the Company has sufficient bank balances and has also obtained a letter of financial support from Pine Labs Limited, Singapore, which is the parent company of one of its shareholders, Brokentusk Technologies Private Limited. Accordingly, considering financial and operational indicators, financial statements of the Company has been prepared on a going concern basis.

(iii) Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest thousands, unless otherwise indicated.

2.1 Summary of significant accounting policies

(i) Use of estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP) requires management to make judgments, estimates and assumptions that affect the application of accounting policies and reported amounts of assets, liabilities, income and expenses and the disclosure of contingent liabilities on the date of the financial statements. Actual results could differ from those estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Any revision to accounting estimates is recognised prospectively in current and future periods.

(ii) Current and non-current classifications

All assets and liabilities are classified into current and non-current.
Assets
An asset is classified as current when it satisfies any of the following criteria:
(a) it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle;
(b) it is held primarily for the purpose of being traded;
(c) it is expected to be realised within 12 months after the reporting date; or
(d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.
Current assets include the current portion of non-current financial assets. All other assets are classified as non-current.

Liabilities
A liability is classified as current when it satisfies any of the following criteria:
(a) it is expected to be settled in the company's normal operating cycle;
(b) it is held primarily for the purpose of being traded;
(c) it is due to be settled within 12 months after the reporting date; or
(d) the company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.
Current liabilities include current portion of non-current financial liabilities. All other liabilities are classified as non-current.

Operating cycle
Operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Based on the nature of operations and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle being a period within 12 months for the purpose of classification of assets and liabilities as current and non-current.

(iii) Intangible assets and amortisation

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses. Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Software and Development cost

Certain direct development costs associated with internally developed software and software enhancements of the company's technology platform are capitalized. Capitalized costs, which occur post determination by management of technical feasibility, include external services and infrastructure costs. These costs are recorded as intangible assets when development is complete and the asset is ready for use. Development activities involve a plan or design for the production of new or substantially improved products and processes. Development expenditure is capitalized only if development costs can be measured. Research and pre-feasibility development costs, as well as maintenance and training costs, are expensed as incurred. In certain circumstances, management may determine that previously developed software and its related expense no longer meets management's definition of feasible, which could then result in the impairment of such asset. Incidental operations are not necessary to bring an asset to the condition necessary for it to be capable of operating in the manner intended by management, the income and related expenses of incidental operations are recognized immediately in profit or loss, and included in their
The useful lives of intangible assets are assessed as either finite or indefinite.

The estimated useful life and amortization method are reviewed at the end of each reporting period.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised as income or expense in the standalone statement of profit or loss.

(iv) Leases
Operating leases
As a lessee

Assets acquired under leases other than finance leases are classified as operating leases. The total lease rentals (including scheduled rental increases) in respect of an asset taken on operating lease are charged to the Statement of Profit and Loss on a straight line basis over the lease term unless another systematic basis is more representative of the time pattern of the benefit. Initial direct costs incurred specifically for an operating lease are deferred and charged to the Statement of Profit and Loss over the lease term.

(v) Taxation

Income tax expense comprises of current tax (i.e. amount of tax for the year determined in accordance with the Income Tax laws) and deferred tax charge or credit (reflecting the tax effects of timing difference between accounting income and taxable income for the year).

The deferred tax charge or credit and the corresponding deferred tax liability and/or deferred tax asset is recognised using the tax rates that have been enacted or substantively enacted by the Balance Sheet date. Deferred tax assets are recognised only to the extent there is reasonable certainty that the assets can be realized in future. However, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognised only if there is virtual certainty of realization of such assets. Deferred tax assets are reviewed as at each Balance Sheet date and are written down or written up to reflect the amount that is reasonably / virtually certain (as the case may be) to be realized.

(vi) Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by weighted average number of equity shares outstanding during the period. The weighted average number of equity shares is adjusted for events such as bonus issue and shares split that have changed the number of equity shares outstanding without a corresponding change in resources.

For calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of equity shares are adjusted for the effects of all dilutive potential equity shares.

(vii) Provisions and contingencies

A provision is created when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

The Company does not recognise assets which are of contingent nature until there is virtual certainty of realisability of such assets. However, subsequently, if it becomes virtually certain that an inflow of economic benefits will arise, asset and related income is recognised in the financial statements of the period in which the change occurs.

(viii) Other income

Interest income is recognized on a time proportion basis taking into account the amount outstanding and the applicable interest rate. Interest income is included under the head "Other Income" in the Statement of Profit and Loss.

(ix) Cash and cash equivalents

Cash and Cash Equivalents in the Balance Sheet comprise cash at bank and in hand and short term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

(Amount in Indian Rupees (INR) Thousands, except per share data, unless otherwise stated)

20 Additional Regulatory Information

(a) Analytical Ratios

Ratio	Numerator	Denominator	31 March 2024	31 March 2023	Variance (in %)
Current ratio (in times) (refer note i below)	Current assets	Current liabilities	1.57	10.64	-85%
Return on equity (in %) (refer note ii below)	Net profit/(loss) after taxes	Average shareholders equity	-1%	-2%	-32%
Trade payables turnover ratio (in times) (refer note iii below)	Other expenses (excluding non cash expenses)	Average trade payable	1.68	5.68	-70%
Return on capital employed (in %) (refer note ii below)	EBIT=Earning before interest and taxes	Capital employed = Tangible net worth	-1%	-2%	-33%

Explanation to variance in ratios
i) Due to increase in other current liabilities on account of increase in provision for expenses.
ii) Due to decrease in loss during the year, primarily on account of decrease in legal and professional expenses.
iii) Due to increase in average trade payables.
iv) Debt Equity Ratio: The Company does not have any debt as on the Balance Sheet date.
v) Debt Service coverage ratio: The Company does not have any debt as on the Balance Sheet date.
